

REMOVE IRON & SULPHUR FROM YOUR WATER!

SYSTEM PERFORMANCE

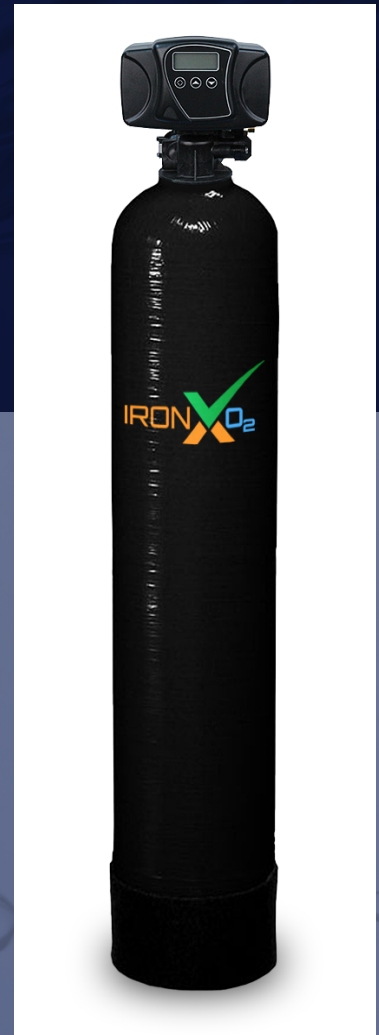

Oxidation process which turns ferrous iron into ferric iron which then filters the insoluble precipitated flakes of iron & manganese from the water.

A SOLUTION FOR IRON & MANGANESE

- Removes iron & manganese
- Removes hydrogen sulfide & rotten egg odor
- Helps eliminate the red, brown & black stains
- No pumps or chemicals

BUILT TO LAST

- Key element in system process is oxygen
- No chemicals or regenerates other than H₂O
- System programmed to backwash periodically & automatically
- Low voltage transformer & no reoccurring costs
